Unit Test

English Language • Grade 6 • English World 6 • Unit 2 • 2026 / 2027

Name:	Section:	Mark: _____ / 30

Q.1 Read the information text, then answer the questions below. **8 points**

Energy is all around us

Power from the Earth

The Earth has natural energy. This energy is renewable. It never runs out. The rocks under the ground are hot and liquid. They make heat. The water in the oceans, rivers and seas is moving all the time. Winds blow around the planet.

Using natural energy

Natural energy can turn a turbine. People have used turbines for thousands of years. Windmills and waterwheels are simple turbines. A turbine is a machine that is turned by wind or liquid. When it turns, it makes energy. A generator makes this energy into electricity.

Wind: The wind turns the blades. These turn the turbine. The generator makes electricity and sends this power along the lines.

Tides: The sea moves around coasts. It moves towards the land then it moves away from the land. These movements are called tides. Sometimes, a barrier is built across the river. When the tide moves up the river, the energy in the water turns turbines and makes electricity. When the tide goes out again, more energy is produced.

Power from the sun

The sun gives us heat and light. Every minute enough energy arrives at the Earth to give us all as much power as we need for a whole year. Solar cells make sunlight into electricity. They power satellites. Many calculators are powered by solar cells. Solar cells can put power into batteries.

Solar power stations are built in hot, sunny places. Hundreds of mirrors are arranged around a tall tower. As the sun moves across the sky, the mirrors turn so that they are always facing the sun. The mirrors reflect sunlight onto the top of the tower. It gets very, very hot. Liquid salt at the top of the tower is heated by the sunlight. The hot liquid is used to make steam. The steam turns a turbine. The turbine turns a generator. The generator makes electricity. Solar power stations are very expensive to build but the energy they use - sunlight - costs nothing at all.

A. Write True or False.

1. Renewable energy always runs out. **(True / False)**

2. Windmills and waterwheels are simple turbines. **(True / False)**

0790146621

3. Solar cells make sunlight into satellites. (True / False)

4. Solar power stations are cheap to build. (True / False)

B. Answer the questions.

5. What is a turbine?

.....

6. What are tides?

.....

7. Where are solar power stations built?

.....

8. What is the hot liquid salt used for?

.....

Q.2 Match each word (1-5) with its English meaning (a-e).	5 points

1. renewable	a) a machine that is turned by wind or liquid to make energy
2. turbine	b) to send back light from a surface
3. generator	c) (of energy) that never runs out
4. tide	d) the movement of the sea towards and away from the land
5. reflect	e) a machine that makes energy into electricity

1. (.....) 2. (.....) 3. (.....) 4. (.....) 5. (.....)

Q.3 Complete the sentences with the correct word from the box.	4 points

energy • calculator • barrier • mirrors

1. Wind, water and sunlight are all renewable forms of ..... .

2. In our maths exam we are allowed to use a ..... .

3. The power of the tide can be used by building a long ..... .

4. Hundreds of ..... are arranged around a tall tower.

Ishraq AL-KHABOUBI ENGLISH LANGUAGE TEACHER

Q.4 Spelling: how many syllables? Write 1 or 2. — 3 points

1. Earth ..... turbine ..... coast .....
2. tower ..... steam ..... mirror .....
3. baby ..... fly ..... puppy .....

Q.5 Grammar: reported speech — 5 points

A. What did they say? Write the sentences.

1. "I am a scientist." (he) **(He said that ...)**

.....

2. "We are engineers." (they) **(They said that ...)**

.....

3. "I am thirsty." (she) **(She said that ...)**

.....

B. Choose the correct answer.

4. "I play the guitar really well." He said he ..... the guitar really well.
   a) played b) playing c) plays
5. "I can sing." He said he ..... sing.
   a) cans b) could c) can

Q.6 Language practice — 2 points

1. Write the word for the picture-machine: wind + mill = ... water + wheel = ...
2. Write the opposite: expensive → ..... natural → .....

Q.7 Writing — 3 points

Write about natural energy in Iceland (6 - 8 sentences). Use these notes: hot rocks under the ground • geysers and hot springs • geothermal power stations look clean • cold water goes down, steam comes up • steam turns a turbine, the turbine turns a generator, the generator makes electricity • people use hot water for heat and lighting in their homes.

.....

.....

.....

.....

.....

Unit 2 Vocabulary • English - English

Word	Class	English meaning
energy	*n*	power that makes machines work or gives heat and light
natural	*adj*	coming from nature, not made by people
renewable	*adj*	(of energy) that never runs out
run out	*v*	to be used up so that there is none left
planet	*n*	a large round object that moves around the sun, like the Earth
turbine	*n*	a machine that is turned by wind or liquid to make energy
windmill	*n*	a building with sails that the wind turns
waterwheel	*n*	a wheel that is turned by moving water
generator	*n*	a machine that makes energy into electricity
electricity	*n*	the power that makes lights and machines work
scientist	*n*	a person who studies science
engineer	*n*	a person who designs and builds machines
blade	*n*	the flat part of a turbine that the wind turns
tide	*n*	the movement of the sea towards and away from the land
coast	*n*	the land next to the sea
barrier	*n*	a wall built across a river to stop water
produce	*v*	to make
wave	*n*	a line of moving water on the sea
solar cell	*n*	a thing that makes sunlight into electricity
satellite	*n*	a machine that goes around the Earth in space
calculator	*n*	a small machine that does sums
battery	*n*	a thing that stores electricity (plural: batteries)
power station	*n*	a place where electricity is made
mirror	*n*	glass in which you can see yourself
reflect	*v*	to send back light from a surface
steam	*n*	the hot gas that water makes when it boils
expensive	*adj*	costing a lot of money
geothermal	*adj*	using the heat inside the Earth
syllable	*n*	a part of a word with one vowel sound

Answer Key

English Language • Grade 6 • English World 6 • Unit 2

Unit 2

Q.1

1. False
2. True
3. False
4. False
5. A machine that is turned by wind or liquid. When it turns, it makes energy.
6. The movements of the sea towards the land and away from the land.
7. In hot, sunny places.
8. To make steam.

Q.2

1. c) (of energy) that never runs out
2. a) a machine that is turned by wind or liquid to make energy
3. e) a machine that makes energy into electricity
4. d) the movement of the sea towards and away from the land
5. b) to send back light from a surface

Q.3

1. energy
2. calculator
3. barrier
4. mirrors

Q.4

1. 1, 2, 1
2. 2, 1, 2
3. 2, 1, 2

Q.5

1. He said that he was a scientist.
2. They said that they were engineers.
3. She said that she was thirsty.
4. a) played
5. b) could

Q.6

1. windmill, waterwheel
2. cheap, man-made (unnatural)

Ishraq AL-KHAROUBI ENGLISH LANGUAGE TEACHER

Q.7

Students' own answers. Mark for: notes in clear sentences and order (1), present simple and passive where needed (1), spelling and punctuation (1).
