Unit Test

English Language • Grade 5 • English World 5 • Unit 3 • 2026 / 2027

Name:	Section:	Mark: _____ / 30

Q.1 Read the information text, then answer the questions below. **8 points**

Building for travel

Tunnels

People cross mountains by car or train and they cross water by boat but these journeys take time. Tunnels can go under mountains and under water. They make journeys much quicker. The longest road tunnel in the world is in Norway. It is 24.5 km long.

A tunnel is an enormous tube and a tube is a very strong shape. When engineers build a tunnel, they make a tube shape in the ground. If the tunnel is not deep the work is easier. Engineers use two cut and cover methods. Method 1: First the trench is dug by diggers. Then tubes are carefully lowered by cranes. Finally the tubes are covered with earth by bulldozers. Method 2: First the walls are made in the ground with concrete. Then the roof is made and covered with earth. Finally, the tunnel is dug by machines.

If the tunnel is deep the engineers must use another method. They use an enormous machine to bore into the earth and rock. It is called a Tunnel Boring Machine (TBM). It cuts rock and clears it away at the same time. It can cut and clear a 25-30 metre length of tunnel each day. The Channel Tunnel joins England and France. It is a railway tunnel and it goes under the sea. Engineers used four TBMs at the same time to cut the tunnel.

Bridges

People have built bridges across rivers for thousands of years. The beam bridge is the simplest kind of bridge. A log or a plank across a stream is a short beam bridge. A long beam bridge is supported by piers at each end. This kind of bridge cannot cross a very wide river.

An arch can support a lot of weight so it can hold up a longer bridge. Bridges made by people long ago often had many arches. The Bridge of 33 Arches in Iran is four hundred years old. In summer, it is full of visitors and delighted children paddle in the shallow water underneath.

A suspension bridge can be even longer. The bridge is supported by strong cables. The cables are supported by tall towers. Suspension bridges are designed by engineers to cross wide rivers and sea channels.

A. Answer the questions.

1. Where is the longest road tunnel in the world?

.....

0790146621

2. What is the name of the machine that bores into the earth and rock?

.....

3. How old is the Bridge of 33 Arches in Iran?

.....

B. Write True or False.

4. If the tunnel is not deep the work is more difficult. **(True / False)**

5. The Channel Tunnel joins England and France. **(True / False)**

6. A long beam bridge is supported by a pier in the middle. **(True / False)**

C. Find from the text:

7. The simplest kind of bridge: .....

8. What supports the cables of a suspension bridge: .....

Q.2 Match each word (1-5) with its English meaning (a-e). — 5 points

1. concrete	a) a long tube which goes through hills or under rivers
2. bulldozer	b) not deep
3. crane	c) a machine which can lift heavy things
4. shallow	d) a big machine which can move earth
5. tunnel	e) strong material which is used for building

1. (.....) 2. (.....) 3. (.....) 4. (.....) 5. (.....)

Q.3 Complete the sentences with the correct word from the box. — 4 points

diggers • bulldozers • concrete • arches

1. First the trench is dug by ..... .

2. Finally the tubes are covered with earth by ..... .

3. First the walls are made in the ground with ..... .

4. Bridges made by people long ago often had many ..... .

Q.4 Spelling: add -ful to the words. — 3 points

1. care → ..... help → .....

Ishraq AL-KHAROUBI ENGLISH LANGUAGE TEACHER

2. use → ..... beauty → .....

3. watch → ..... play → .....

Q.5 Grammar — 5 points

A. Complete with the present simple passive.

1. This bridge ..... of stone. **(make)**

2. Large bridges ..... by engineers. **(design)**

3. Next huge tubes ..... into the trench by cranes. **(lower)**

B. Choose the correct answer.

4. I'm very ..... in collecting stamps.

a) interest b) interesting c) interested

5. Pop music! Oh! How ..... !

a) bore b) boring c) bored

Q.6 Language practice — 2 points

1. Answer: Who are planes flown by? .....

2. Write the words on the lines: the words under a picture = ... a simple drawing = ...

Q.7 Writing — 3 points

Write two paragraphs about the Channel Tunnel (6 - 8 sentences). Paragraph 1: information about the tunnel (it joins England and France; total length 50.450 km, 38 km under the sea; London to Paris by train takes 2½ hours). Paragraph 2: how the tunnel works (three tunnels; some trains carry lorries only; cars and buses are carried under the sea in 35 minutes; passages every 375 m for engineers).

.....

.....

.....

.....

.....

.....

.....

♡ Good Luck ♡

Unit 3 Vocabulary ● English - English

Word	Class	English meaning
concrete	*n*	strong material which is used for building
bulldozer	*n*	a big machine which can move earth
crane	*n*	a machine which can lift heavy things
shallow	*adj*	not deep
tunnel	*n*	a long tube which goes through hills or under rivers
lower	*v*	to make something go down

Answer Key

English Language • Grade 5 • English World 5 • Unit 3

Unit 3

Q.1

1. In Norway.
2. A Tunnel Boring Machine (TBM).
3. Four hundred years old.
4. False
5. True
6. False
7. The beam bridge.
8. Tall towers.

Q.2

1. e) strong material which is used for building
2. d) a big machine which can move earth
3. c) a machine which can lift heavy things
4. b) not deep
5. a) a long tube which goes through hills or under rivers

Q.3

1. diggers
2. bulldozers
3. concrete
4. arches

Q.4

1. careful, helpful
2. useful, beautiful
3. watchful, playful

Q.5

1. is made
2. are designed
3. are lowered
4. c) interested
5. b) boring

Q.6

1. Planes are flown by pilots.
2. caption, diagram
